Comments.

- (1) The statements on Stettin-Altdamm airfield are not clear. It is believed, however, that the field is used by commercial planes only.
- (2) First report on **Strzebielino airfield**. For pin-point location [REDACTED]
- (3) It is known that the field was provided with a runway prior to 1945. It is believed credible that the field was reconditioned and occupied by a Soviet unit.
- (4) It is possible that the airfield is being used as a training field. For location sketch [REDACTED]
